

NAGA JHANSI PASUPULETI

AI Full Stack Engineer

+91 8008911409 | nagajhansi63@gmail.com | linkedin.com/in/jhansi-pasupuleti-29a1b127a | Hyderabad, India

PROFESSIONAL SUMMARY

Results-driven AI Full Stack Engineer with 4 years of experience building production-grade web applications and integrating Generative AI solutions. Proven track record delivering enterprise agentic platforms using LangGraph, CopilotKit SDK, and RAG pipelines. Skilled in end-to-end development across React, Next.js, Node.js, and Python (FastAPI), with hands-on experience deploying AI-driven automation on GCP with Docker and Kubernetes.

TECHNICAL SKILLS

Frontend: React.js, React Native, Next.js, Redux, TypeScript, JavaScript

Backend: Node.js, Express.js, Python (FastAPI)

AI & GenAI: LangGraph, LangChain, CopilotKit SDK, OpenAI API, RAG (Retrieval-Augmented Generation), LLM Integration, Human-in-the-Loop (HIL), MCP Server

Databases: PostgreSQL, MongoDB, Firebase, Prisma ORM

Cloud : GCP

UI Libraries: Tailwind CSS, Material UI, Fluent UI, Shadcn UI, Bootstrap

Platforms: SharePoint, PowerApps, Power Automate

Tools: Git, Postman, Swagger UI, VS Code, Figma

Integrations: Stripe, Google Calendar, Microsoft Graph, NATS, WebSockets, Webhooks

WORK EXPERIENCE

Zelarsoft Private Limited Oct 2022 – Present

AI Full Stack Developer | Hyderabad, India

- Architected and delivered 4+ enterprise applications across AI automation, DevOps, healthcare, and e-commerce domains, supporting 500+ concurrent users with 99.9% uptime.
- Built agentic AI platform (Cokpit) integrating LangGraph multi-agent workflows and CopilotKit SDK, reducing manual DevOps task execution time by an estimated 60%.
- Developed cross-platform web and mobile applications using React.js, React Native, and Next.js, achieving consistent feature parity and reducing UI bug reports by 40%.
- Engineered RESTful and real-time APIs with Node.js and Python FastAPI, incorporating WebSockets and Webhooks, cutting average API response time by 35%.
- Implemented server-side rendering (SSR) with Next.js, improving page load performance by 50% and boosting SEO scores by 30 points across key pages.
- Designed and managed PostgreSQL and MongoDB schemas for 5+ projects, reducing query response time by 45% through optimised indexing and Prisma ORM integration.
- Integrated multi-role authentication, real-time chat, and secure payment workflows (Stripe, Lago), supporting onboarding for 1,000+ users across the Mindly platform.
- Improved frontend performance through React Query caching, code-splitting, and lazy loading, reducing initial bundle size by 30%.
- Participated in Agile sprints, leading code reviews for a team of 5–8 engineers and contributing to sprint planning, reducing release cycle time by 20%.

PROJECTS

Cokpit — AI-Powered Enterprise Automation Platform | Sep 2025 – Present | Developer | Team: 8

Tech: Next.js, CopilotKit SDK, LangGraph, Python, PostgreSQL, OpenAI API, Tailwind CSS, NATS, Docker, Kubernetes, GCP

A customisable AI-powered organisational platform automating employee onboarding, Jira automation, SRE incident management, and DevOps CI/CD using intelligent multi-agent workflows.

- Integrated CopilotKit SDK to power intelligent chat UX across the platform, enabling natural language task execution for 10+ business workflows.
- Implemented Human-in-the-Loop (HIL) components for critical decision workflows, reducing agent error rate by approximately 30%.
- Built Knowledge Base and MCP Server UI connecting contextual data to AI agents, improving agent task accuracy across 8 platform integrations.
- Developed reusable GenUI component library supporting all platform integrations, reducing new feature development time by 40%.

Mindly — Healthcare Application for Autism Support | Dec 2024 – Aug 2025 | Developer | Team: 5

Tech: React.js, React Native, Firebase, Material UI, Node.js, React Query, Stripe, Google Calendar, Microsoft Graph

Full-stack healthcare platform supporting children with autism, tracking engagement across schools, teachers, and 1,000+ students.

- Delivered cross-platform web and mobile apps with feature parity, onboarding 1,000+ users across 3 role types (admin, teacher, student).
- Built real-time group and 1-on-1 chat with Firebase, achieving sub-200ms message delivery.
- Integrated Stripe and Lago for subscription billing and invoicing, processing payments for 500+ monthly active subscribers.

Review Deals — E-Commerce Discovery Platform | Jun 2023 – Dec 2024 | Developer | Team: 6

Tech: React.js, Node.js, MongoDB, Google Authentication

- Developed frontend with React.js including Context API state management, reducing page render time by 25%.
- Built Node.js backend with MongoDB data layer and Excel bulk-upload feature, enabling admin management of 10,000+ product listings.

Inside-View — Utility Billing Portal (Canada) | Nov 2022 – May 2023 | Developer | Team: 1

Tech: Next.js, Node.js, Supabase

- Built secure admin and customer portal for Canadian utility billing (water, gas, thermal), managing authentication and automated billing workflows for multi-service customers.

CERTIFICATIONS

Google Cloud Certified: Professional Data Engineer | Google Cloud Platform

Professional Training in ReactJS & Frontend Technologies

Microsoft Power Platform Training (SharePoint, PowerApps, Power Automate)

EDUCATION

Sri Padmavathi Mahila University Jul 2020 – May 2022

Master of Science (M.Sc.) — Physics

Jagan's Degree & PG College Jun 2017 – May 2020

Bachelor of Science (B.Sc.) — Physics
